HAMILTON ETFS

Fund Objectives

The fund is designed to closely track the returns of the Solactive Australian Bank Equal-Weight Index TR, comprised of equal weightings of Australia's "Big-5" banks, rebalanced semi-annually.

Reasons to Invest in HBA

The Solactive Australian Bank Equal-Weight Index TR has outperformed an equal-weight index of Canada's largest banks while also providing **strong dividend income**

Diversification: many Canadian investors have a high concentration of domestic banks; Australian banks provide similar returns and volatility, with a history of outperformance

Over the last several decades, Australia's economy has been **among the world's best**

Commissions, management fees and expenses all may be associated with investments in exchange traded funds (ETFs) managed by Hamilton ETFs. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in per unit value and reinvestment of all dividends or distributions and does not take into account sales, redemptions, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Only the returns for periods of one year or greater are annualized returns. ETFs are not guaranteed, their values change frequently and past performance may not be repeated.

Did you know?

Australian banks performed better than their Canadian peers during the **global financial crisis**
