A smarter way to invest in Canadian banks

Hamilton Canadian Bank Mean Reversion Index ETF (HCA) is a great solution for investing in Canadian banks over the long term

HCA Highlights

- The **Solactive Canadian Bank Mean Reversion Index TR** has outperformed an equal weight portfolio of Canada's banks — especially in turbulent times
- Exposure to **Canadian banks** using a mean reversion strategy with quarterly rebalancing
- Potential for **higher long-term returns and lower downside volatility**

Growth of \$10,000

Returns

Hamilton Canadian Bank Mean Reversion Index ETF

HAMILTON ETFs

Fund Objectives

The fund is designed to closely track the returns of the Solactive Canadian Bank Mean Reversion Index TR, which applies a mean reversion strategy to Canada's "Big Six" banks. Historically, buying the laggards and selling the winners has been a winning strategy, as Canadian banks – over the long run – tend to generate similar returns.

Value of \$100k invested
since 1990²

Reasons to Invest in HCA

Benefits of mean reversion have been greatest in periods of market turbulence

Monthly distributions

Mean reversion outperformed **every Canadian bank stock** and **equal weight portfolio** over the long term¹

Commissions, management fees and expenses all may be associated with investments in exchange traded funds (ETFs) managed by Hamilton ETFs. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in per unit value and reinvestment of all dividends or distributions and does not take into account sales, redemptions, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Only the returns for periods of one year or greater are annualized returns. ETFs are not guaranteed, their values change frequently and past performance may not be repeated.
