Disclaimers

Commissions, management fees and expenses all may be associated with investments in exchange traded funds (ETFs) managed by Hamilton ETFs. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in per unit value and reinvestment of all dividends or distributions and does not take into account sales, redemptions, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Only the returns for periods of one year or greater are annualized returns. ETFs are not guaranteed, their values change frequently and past performance may not be repeated. The yield is an estimate of the annualized yield an investor would receive if the most recent distribution remained unchanged for the next 12 months, stated as a percentage of the price per unit on the as at date. The yield calculation excludes any additional year end distributions and does not include reinvested distributions.

1. Canadian Bank Index is the Solactive Equal Weight Canada Banks Index (SOLCBEW). Since March 16, 2007, as at December 31, 2024. Used to illustrate the effects of compound growth. It is not intended to reflect future returns on investments in the ETF. The index performance returns are for illustrative purposes only, and the returns do not reflect any management fees, transaction costs or expenses. Investors cannot invest directly in an index. Source: Bloomberg, Hamilton ETFs; 2. Volatility is the annualized standard deviation of daily returns since Oct 14, 2020. As at December 31, 2024. Source: Bloomberg, Hamilton ETFs; 3. Effective April 14, 2023, the investment objective of the Hamilton Enhanced Canadian Bank ETF (HCAL) was changed to equal weight exposure from its prior mean reversion approach. In certain markets, the current approach is expected to outperform the prior. Please refer to the disclosure documents of HCAL at www.hamiltonetfs.com.
