MANAGEMENT REPORT OF FUND PERFORMANCE

This interim management report of fund performance for Hamilton Technology YIELD MAXIMIZER™ ETF ("QMAX" or the "ETF") contains financial highlights and is included with the unaudited interim financial statements for the investment fund. You may request a copy of the investment fund's audited annual financial statements, annual management report of fund performance, current proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosures, at no cost, by calling (416) 941-9888, by writing to Hamilton Capital Partners Inc. ("Hamilton ETFs" or the "Manager"), at 121 King Street West, Suite 1601, Toronto, Ontario, M5H 3T9, by visiting our website at www.hamiltonetfs.com or through SEDAR+ at www.sedarplus.ca.

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance, or expectations that are not historical facts but instead represent our beliefs regarding future events. By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. We caution readers of this document not to place undue reliance on our forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements.

Actual results may differ materially from management expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to market and general economic conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the ETF may invest and the risks detailed from time to time in the ETF's prospectus. New risk factors emerge from time to time and it is not possible for management to predict all such risk factors. We caution that the foregoing list of factors is not exhaustive, and that when relying on forward-looking statements to make decisions with respect to investing in the ETF, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, the Manager does not undertake, and specifically disclaims, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable law.

Management Discussion of Fund Performance

Investment Objective and Strategy

The investment objective of QMAX is to deliver attractive monthly income, while providing exposure to a portfolio of primarily large-cap U.S.-exchange traded technology equity securities. To supplement dividend income earned on the equity holdings, mitigate risk and reduce volatility, QMAX will employ a covered call option writing program. The ETF is offered for sale on a continuous basis by its prospectus in Class E Units ("Class E") and US\$ Unhedged Units, which trade on the Toronto Stock Exchange ("TSX") in Canadian Dollars ("CDN\$ units") and in U.S. Dollars ("US\$ units") under the symbols QMAX and QMAX.U, respectively.

QMAX seeks to achieve its investment objective by investing in an equal weight largecap equity portfolio of technology companies listed primarily in the U.S. (each, a "Tech Company", and collectively, "Tech Companies"). As an alternative to, or in conjunction with directly investing in and holding equity securities, QMAX may also invest in other securities, including other investment funds, to obtain direct or indirect exposure to other Tech Company securities in a manner that is consistent with QMAX's investment objective. QMAX may also hold cash and cash equivalents or other money market instruments in order to meet its obligations.

The Manager reviews the portfolio holdings on an ongoing basis for possible additions, removals, or substitutions that in its discretion would be beneficial to QMAX and its Unitholders. The issuers included in the portfolio will largely be based on market capitalization, however the Manager's rationale for additions, removals, or substitutions may include, but not be limited to: (i) its view on the liquidity of an issuer; and (ii) the availability and liquidity of an issuer's options. Changes to the portfolio holdings may occur at the Manager's discretion, and the entire portfolio will be rebalanced to equal weight at the Manager's discretion and at least semi-annually.

Management Discussion of Fund Performance (continued)

To mitigate downside risk and generate income, the Manager will actively manage a covered call strategy of QMAX that will generally write at or slightly out of the money call options, at its discretion, on up to 100% of the value of QMAX's portfolio. Notwithstanding the foregoing, QMAX may write covered call options on a lesser percentage of the portfolio, from time to time, at the discretion of the Manager.

Risk

Investments in the units of the ETF can be speculative, involve a degree of risk and are suitable only for persons who are able to assume the risk of losing their entire investment. The risks of investing are disclosed in the ETF's prospectus and there have been no significant changes during the year/period that affected the overall level of risk associated with the ETF. **Prospective investors should read the ETF's prospectus and consider the full description of the risks contained therein before purchasing units.** The prospectus is available at www.hamiltonetfs.com or from www.sedarplus.ca, or by contacting Hamilton Capital Partners Inc. directly via the contact information on the back page of this document.

Results of Operations

For the six month period ended June 30, 2026, Class E units of the ETF returned 26.16%, when including distributions paid to unitholders, while the US\$ Unhedged Units returned 22.08% on the same basis. By comparison, the Cboe NASDAQ-100 Half BuyWrite V2 ("Benchmark Index") returned 19.94% in Canadian dollars, and 15.82% in U.S. dollars, and the Nasdaq-100 Index returned 24.58% in Canadian dollars, and 20.31% in U.S. dollars respectively, for the same period, on a total return basis. To supplement dividend income earned on the equity holdings, mitigate risk and reduce volatility, the ETF employs a covered call option writing program. The impact of the option writing program is one source of the performance difference between the ETF and the Benchmark Index.

The Cboe NASDAQ-100 Half BuyWrite V2 Index measures the total rate of return of a NASDAQ-100 covered call strategy. This strategy consists of holding a portfolio indexed to the NASDAQ-100 and selling a succession of one-month at-the-money NASDAQ-100 (NDX) call options.

The Nasdaq-100 Index includes 100 of the largest domestic and international non-financial companies listed on The Nasdaq Stock Market based on market capitalization.

Market Review

During the first half of 2026, the U.S. economy continued to expand at a moderate pace, with consumer spending providing support through much of the period and employment gains remaining positive, though hiring moderated compared with prior years. Inflation pressures were relatively contained early in the period, before firming through March and April as energy prices rose sharply following the escalation of conflict in the Middle East. While higher energy costs pushed headline inflation higher, underlying inflation pressures remained more contained.

The Federal Reserve held its policy rate steady at 3.50% to 3.75% at each of its scheduled meetings throughout the period. Geopolitical developments in the Middle East and ongoing trade policy uncertainty contributed to periodic volatility but did not derail broader market sentiment. U.S. equities advanced over the period, recovering from a sharp drawdown in late February and March before moving to near record levels by June, while longer-term Treasury yields were volatile but ended the period higher overall, and investment grade credit conditions remained firm.

The U.S. technology sector outpaced the broader equity market in the first half of 2026, though the path was uneven. Large cap technology stocks declined sharply alongside the broader market in late February and March before

Management Discussion of Fund Performance *(continued)*

rebounding strongly through the second quarter as major platform companies reaffirmed artificial intelligence (AI) capital expenditure commitments, while semiconductor and AI infrastructure names led the advance.

U.S. technology equity volatility was elevated through the period, with sharp moves in late February and March driven by the broader geopolitical shock and its implications for energy prices, inflation, and interest-rate expectations. Volatility remained elevated at times thereafter, around earnings releases, AI spending announcements, and changing market expectations for sector specific growth. Option premiums firmed during periods of stress and moderated as conditions steadied.

Portfolio Review

The ETF invests in a sample of the largest technology companies in the United States for which an active exchange-traded options market exists. The holdings are equally weighted, rebalanced semi-annually, and the ETF does not seek to hedge its foreign currency exposure. During the period, Intel Corp., Micron Technology Inc., Applied Materials Inc., and Lam Research Corp. were added to the ETF, while Booking Holdings Inc., Qualcomm Inc., Intuit, and AppLovin Corp. were removed, reflecting changes in their respective market capitalization rankings.

The three most significant contributors to the ETF's performance were Intel Corp., reflecting increased demand and major hyperscaler partnerships, Micron Technology Inc., supported by elevated memory pricing and AI-driven demand, and Advanced Micro Devices Inc., reflecting robust data centre and AI infrastructure demand. The largest detractors to performance were Palantir Technologies Inc. and AppLovin Corp., primarily reflecting valuation volatility and multiple compression following prior share price appreciation, and Intuit Inc., as software stocks rerated amid investor concerns regarding the potential impact of AI on traditional software business models.

Option premiums moved alongside shifts in technology sector volatility through the period, firming during episodes of geopolitical uncertainty and AI related market moves before easing as conditions steadied. The Manager adjusted the coverage ratio during the period to help generate the desired level of option premiums for the ETF.

Outlook

While geopolitical tensions and trade-related uncertainty continue to weigh on the global outlook, the Manager expects the U.S. technology sector to remain an important driver of market performance through the remainder of 2026, supported by strong corporate earnings, continued investment in artificial intelligence, and ongoing demand for digital infrastructure. Continued spending on AI-related hardware, cloud computing, and semiconductor capacity is expected to continue across much of the sector, while improving monetization of AI investments could provide an additional catalyst for earnings.

With the upcoming U.S. midterm elections, market volatility is expected to remain elevated through the remainder of 2026 as investors continue to assess developments in trade policy, AI-related investment, geopolitical risks, and the outlook for monetary policy. The AI investment boom is likely to create "winners" and "losers" in the technology sector, which is likely to add to the volatility. The Manager will actively adjust option coverage levels in response to evolving market conditions.

Other Operating Items and Changes in Net Assets Attributable to Holders of Redeemable Units

For the six-month period ended June 30, 2026, the ETF generated net investment income from investments and derivatives (which includes changes in the fair value of the ETF's portfolio) of \$223,133,833. This compares to \$27,656,561 for the period ended June 30, 2025. The ETF incurred management, operating and transaction expenses of \$3,382,150 (2025 – \$2,393,279) of which \$nil (2025 – \$nil) was either paid or absorbed by the Manager on behalf of the ETF. The

Management Discussion of Fund Performance (continued)

waiving and/or absorption of such fees and/or expenses by the Manager may be terminated at any time, without notice, or continued indefinitely, at the discretion of the Manager.

The ETF distributed \$45,757,525 to unitholders during the period (2025 – \$32,685,846).

Presentation

The attached financial statements have been prepared in accordance with IFRS Accounting Standards ("IFRS"). Any mention of total net assets, net assets, net asset value or increase (decrease) in net assets in the financial statements and/or management report of fund performance is referring to net assets or increase (decrease) in net assets attributable to holders of redeemable units as reported under IFRS.

Recent Developments

There are no recent industry, management or ETF-related developments that are pertinent to the present and future of the ETF.

Related Party Transactions

Certain services have been provided to the ETF by related parties and those relationships are described below.

Manager, Trustee and Portfolio Adviser

The manager, trustee and portfolio adviser of the ETF is Hamilton Capital Partners Inc., 121 King Street West, Suite 1601, Toronto, Ontario, M5H 3T9, a corporation incorporated under the laws of the Province of Ontario.

Any management fees paid to the Manager (described in detail on page 10) are related party transactions, as the Manager is considered to be a related party to the ETF. Fees paid to the Independent Review Committee are also considered to be related party transactions. Both the management fees and fees paid to the Independent Review Committee are disclosed in the statements of comprehensive income in the attached financial statements of the ETF. The management fees payable by the ETF as at June 30, 2026, and December 31, 2025, are disclosed in the statements of financial position.

Financial Highlights

The following tables show selected key financial information about the ETF and are intended to help you understand the ETF's financial performance for the current interim reporting period and since Class E Units effectively began operations on October 25, 2023, and US\$ Unhedged Units effectively began operations on August 29, 2025. This information is derived from the ETF's audited annual financial statements and the current unaudited interim financial statements. Please see the first page for information on how you may obtain the annual or interim financial statements.

The ETF's Net Assets per Unit

Class E Units

Period ⁽¹⁾		2026	2025	2024	2023
Net assets per unit, beginning of period	\$	22.79	21.92	17.95	16.00
Increase (decrease) from operations:					
Total revenue		0.04	0.11	0.12	0.02
Total expenses		(0.09)	(0.19)	(0.19)	(0.03)
Realized gains (losses) for the period		(0.03)	1.23	0.74	(0.23)
Unrealized gains (losses) for the period		6.20	2.65	5.69	1.63
Total increase (decrease) from operations ⁽²⁾		6.12	3.80	6.36	1.39
Distributions:					
From net investment income (excluding dividends)		(1.25)	–	–	–
From net realized capital gains		–	(0.40)	(0.29)	(0.19)
From return of capital		–	(2.06)	(2.10)	(0.17)
Total distributions ⁽³⁾		(1.25)	(2.46)	(2.39)	(0.36)
Net assets per unit, end of period ⁽⁴⁾	\$	27.20	22.79	21.92	17.95

**Financial Highlights** (continued)**US\$ Unhedged Units**

Period ⁽¹⁾	2026	2025
Net assets per unit, beginning of period	\$ 22.93	21.97
Increase (decrease) from operations:		
Total revenue	0.04	0.03
Total expenses	(0.09)	(0.07)
Realized gains (losses) for the period	–	0.77
Unrealized gains (losses) for the period	5.98	0.48
Total increase (decrease) from operations ⁽²⁾	5.93	1.21
Distributions:		
From net investment income (excluding dividends)	(1.26)	–
From net realized capital gains	–	(0.10)
From return of capital	–	(0.50)
Total distributions ⁽³⁾	(1.26)	(0.60)
Net assets per unit, end of period in Canadian dollars ⁽⁴⁾	\$ 27.36	22.93
Net assets per unit, end of period in U.S. dollars ⁽⁴⁾	\$ 19.29	16.71

1. This information is derived from the ETF's unaudited interim financial statements and audited annual financial statements.
2. Net assets per unit and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period.
3. Income, dividend and/or return of capital distributions, if any, are paid in cash, reinvested in additional units of the ETF, or both. Capital gains distributions, if any, may or may not be paid in cash. Non-cash capital gains distributions are reinvested in additional units of the ETF and subsequently consolidated. They are reported as taxable distributions and increase each unitholder's adjusted cost base for their units. Neither the number of units held by the unitholder, nor the net asset per unit of the ETF change as a result of any non-cash capital gains distributions. Distributions classified as return of capital, if any, decrease each unitholder's adjusted cost base for their units.
4. The Financial Highlights are not intended to act as a continuity of the opening and closing net assets per unit.

Management expense ratio ⁽²⁾	0.77%	0.77%	0.80%	0.78%
Management expense ratio before waivers and absorptions ⁽³⁾	0.77%	0.77%	0.80%	0.78%
Trading expense ratio ⁽⁴⁾	0.03%	0.03%	0.06%	0.05%
Portfolio turnover rate ⁽⁵⁾	50.53%	67.44%	56.79%	10.34%
Net asset value per unit, end of period	\$ 27.20	22.79	21.92	17.95
Closing market price	\$ 27.19	22.81	21.93	17.94

US\$ Unhedged Units

Period ⁽¹⁾	2026	2025
Total net asset value (000's)	\$ 8,566	6,020
Number of units outstanding (000's)	313	263
Management expense ratio ⁽²⁾	0.77%	0.75%
Management expense ratio before waivers and absorptions ⁽³⁾	0.77%	0.75%
Trading expense ratio ⁽⁴⁾	0.03%	0.03%
Portfolio turnover rate ⁽⁵⁾	50.53%	67.44%
Net asset value per unit, end of period in Canadian dollars	\$ 27.36	22.93
Net asset value per unit, end of period in U.S. dollars	\$ 19.29	16.71
Closing market price in U.S. dollars	\$ 19.33	16.72

1. This information is provided as at June 30, 2026 and December 31 of the other year/period shown.
2. Management expense ratio is based on total expenses, including sales tax, (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the year/period. Out of its management fees, and waivers and absorptions, as applicable, the Manager pays for such services to the ETF as portfolio manager compensation, service fees and marketing.
3. The Manager, at its discretion, may waive and/or absorb a portion of the fees and/or expenses otherwise payable by the ETF. The waiving and/or absorption of such fees and/or expenses by the Manager may be terminated at any time, without notice, or continued indefinitely, at its discretion.
4. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year/period.
5. The ETF's portfolio turnover rate indicates how actively its portfolio investments are traded. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the year. Generally, the higher the portfolio turnover rate in a year/period, the greater the trading costs payable by the ETF in the year/period, and the greater the chance of an investor receiving taxable capital gains in the year/period. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.

Financial Highlights (continued)

Management Fees

The Manager provides, or oversees the provision of, administrative services required by the ETF including, but not limited to: negotiating contracts with certain third-party service providers, such as custodians, registrars, transfer agents, auditors and printers; authorizing the payment of operating expenses incurred on behalf of the ETF; arranging for the maintenance of accounting records for the ETF; preparing reports to unitholders and to the applicable securities regulatory authorities; calculating the amount and determining the frequency of distributions by the ETF; preparing financial statements, income tax returns and financial and accounting information as required by the ETF; ensuring that unitholders are provided with financial statements and other reports as are required from time to time by applicable law; ensuring that the ETF complies with all other regulatory requirements, including the continuous disclosure obligations of the ETF under applicable securities laws; administering purchases, redemptions and other transactions in units of the ETF; and dealing and communicating with unitholders of the ETF. The Manager provides office facilities and personnel to carry out these services, if not otherwise furnished by any other service provider to the ETF. The Manager also monitors the investment strategies of the ETF to ensure that the ETF complies with its investment objectives, investment strategies and investment restrictions and practices.

In consideration for the provision of these services, the Manager receives a monthly management fee at the annual rate of 0.65%, plus applicable sales taxes, of the net asset value of the ETF, calculated and accrued daily and payable monthly in arrears.

Any expenses of the ETF that are waived or absorbed by the Manager are paid out of the management fees received by the Manager.

The table below details, in percentage terms, the services received by the ETF from the Manager in consideration of the management fees paid during the period.

Portfolio management fees, general administrative costs, marketing, and profit	Waived/absorbed expenses of the ETF
100%	–

Past Performance

Commissions, management fees, expenses and applicable sales taxes all may be associated with an investment in the ETF. Please read the prospectus before investing. The indicated rates of return are the historical total returns including changes in unit value and reinvestment of all distributions, and do not take into account sales, redemptions, distributions or optional charges or income taxes payable by any investor that would have reduced returns. An investment in the ETF is not guaranteed. Its value changes frequently and past performance may not be repeated. The ETF's performance numbers assume that all distributions, if any, are reinvested in additional units of the ETF. If you hold this ETF outside of a registered plan, income and capital gains distributions that are paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units. The amount of the reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the ETF, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The following chart presents the ETF's performance for the years/period shown, and illustrates how the performance has changed from period to period. In percentage terms, the chart shows how much an investment made on the first day of the financial period would have grown or decreased by the last day of the financial period.

Class E units (QMAX) effectively began operations on October 25, 2023.

US\$ Unhedged Units (QMAX.U) effectively began operations on August 29, 2025.

Notes to Financial Statements (unaudited)

For the Periods Ended June 30, 2026 and 2025

1. REPORTING ENTITY

Hamilton Technology YIELD MAXIMIZER™ ETF ("QMAX" or the "ETF") is an investment trust established under the laws of the Province of Ontario by Declaration of Trust on September 8, 2023. Class E Units began operations on October 25, 2023, and US\$ Unhedged Units began operations on August 29, 2025. The address of the ETF's registered office is: c/o Hamilton Capital Partners Inc., 121 King Street West, Suite 1601, Toronto, Ontario, M5H 3T9.

The ETF is offered for sale on a continuous basis by its prospectus in Class E Units ("CAD Units") and US\$ Unhedged Units ("US Units") which trade on the Toronto Stock Exchange ("TSX") in Canadian dollars and in U.S. dollars under the symbol QMAX and QMAX.U, respectively. CAD Units are a separate class of units of the ETF that are similar to the US Units but are intended for investors who wish to purchase and redeem Units in Canadian dollars and not hedge against currency fluctuations between the Canadian and U.S. dollar. An investor may buy or sell units of the ETF on the TSX only through a registered broker or dealer in the province or territory where the investor resides. Investors are able to trade units of the ETF in the same way as other securities traded on the TSX, including by using market orders and limit orders and may incur customary brokerage commissions when buying or selling units.

The investment objective of QMAX is to deliver attractive monthly income, while providing exposure to a portfolio of primarily large-cap U.S.-exchange traded technology equity securities. To supplement dividend income earned on the equity holdings, mitigate risk and reduce volatility, QMAX will employ a covered call option writing program.

Hamilton Capital Partners Inc. ("Hamilton ETFs" or the "Manager") is the manager, trustee and portfolio adviser of the ETF. The Manager is responsible for implementing the ETF's investment strategies.

2. BASIS OF PREPARATION***(i) Statement of compliance***

The financial statements have been prepared in accordance with IFRS Accounting Standards ("IFRS"). Any mention of total net assets, net assets, net asset value or increase (decrease) in net assets is referring to net assets or increase (decrease) in net assets attributable to holders of redeemable units as reported under IFRS.

These financial statements were authorized for issue on August 17, 2026, by the Board of Directors of the Manager.

(ii) Basis of measurement

The financial statements have been prepared on a historical cost basis except for financial instruments at fair value through profit or loss, which are measured at fair value.

(iii) Functional and presentation currency

The financial statements are presented in Canadian dollars, which is the ETF's functional currency.

3. MATERIAL ACCOUNTING POLICY INFORMATION

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

(a) Financial instruments***(i) Recognition, initial measurement and classification***

The ETF is subject to IFRS 9, Financial Instruments ("IFRS 9") for the classification and measurement requirements for financial instruments, including impairment on financial assets and hedge accounting.

This standard requires assets to be classified based on the ETF's business model for managing the financial assets and contractual cash flow characteristics of the financial assets. The standard includes three principal classification categories for financial assets: measured at amortized cost, fair value through other comprehensive income, and fair value through profit and loss ("FVTPL"). IFRS 9 requires classification of debt instruments, if any, based solely on payments of principal and interest and business model tests.

The ETF's financial assets and financial liabilities are managed and its performance is evaluated on a fair value basis. The contractual cash flows of the ETF's debt securities, if any, consist solely of principal and interest, however, these securities are neither held in held-to-collect, or held-to-collect-and-sell business models in IFRS 9.

Financial assets and financial liabilities at FVTPL are initially recognized on the trade date, at fair value (see below), with transaction costs recognized in the statements of comprehensive income. Other financial assets and financial liabilities are recognized on the date on which they are originated at fair value.

The ETF classifies financial assets and financial liabilities into the following categories:

- Financial assets mandatorily classified at fair value through profit or loss: debt securities, equity investments and derivative financial instruments
- Financial assets at amortized cost: all other financial assets
- Financial liabilities classified at fair value through profit or loss: derivative financial instruments and securities sold short, if any
- Financial liabilities at amortized cost: all other financial liabilities

(ii) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the ETF has access at that date. The fair value of a liability reflects its non-performance risk.

Investments are valued at fair value as of the close of business on each day upon which a session of the TSX is held ("Valuation Date") and based on external pricing sources to the extent possible. Investments held that are traded in an active market through recognized public stock exchanges, over-the-counter markets, or through recognized investment dealers, are valued at their closing sale price. However, such prices may be adjusted if a more accurate value can be obtained from recent trading activity or by incorporating other relevant information that may not have been reflected in pricing obtained from external sources. Short-term investments, including notes and money market instruments, are valued at amortized cost which approximates fair value.

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

Investments held that are not traded in an active market, including some derivative financial instruments, are valued using observable market inputs where possible, on such basis and in such manner as established by the Manager. Derivative financial instruments are recorded in the statements of financial position according to the gain or loss that would be realized if the contracts were closed out on the Valuation Date. Margin deposits, if any, are included in the schedule of investments as margin deposits. See also, the summary of fair value measurements in note 6.

Fair value policies used for financial reporting purposes are the same as those used to measure the net asset value ("NAV") for transactions with unitholders.

The fair value of other financial assets and liabilities approximates their carrying values due to the short-term nature of these instruments.

(iii) Offsetting

Financial assets and liabilities are offset and the net amount presented in the statements of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis for gains and losses from financial instruments at fair value through profit or loss and foreign exchange gains and losses.

(iv) Specific instruments**Cash and cash equivalents**

Cash and cash equivalents consist of cash on deposit and short-term, interest bearing notes with a term to maturity of less than three months from the date of purchase.

Forward foreign exchange contracts

Forward foreign exchange contracts, if any, are valued at the current market value thereof on the Valuation Date. The value of these forward contracts is the gain or loss that would be realized if, on the Valuation Date, the positions were to be closed out and recorded as derivative assets and/or liabilities in the statements of financial position and as a net change in unrealized appreciation (depreciation) of investments and derivatives in the statements of comprehensive income. When the forward contracts are closed out or mature, realized gains or losses on forward contracts are recognized and are included in the statements of comprehensive income in net realized gain (loss) on sale of investments and derivatives. The Canadian dollar value of forward foreign exchange contracts is determined using forward currency exchange rates supplied by an independent service provider.

Redeemable units

The redeemable units are measured at the present value of the redemption amounts and are considered a residual amount of the net assets attributable to holders of redeemable units. They are classified as financial liabilities as a result of the ETF's requirement to distribute, at the option of the unitholder, net income and capital gains in cash.

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

Options

As part of the ETF's investment strategy, call options are written on the equities in the ETF's portfolio. The premium received from writing a call option is recorded as a derivative liability in the statements of financial position. These call options are valued at the current market value thereof on the Valuation Date. The difference between the premium received when the option was written and its current market value is recorded as a net change in unrealized appreciation (depreciation) of investments and derivatives in the statements of comprehensive income.

When a written call option expires, the ETF will realize a gain equal to the premium received. When a written option is bought back, the ETF will realize a gain or loss equal to the difference between the cost at which the contract was re-purchased and the premium received. When a written call option is exercised, the premium received is added to the proceeds from the sale of the underlying investments to determine the realized gain or loss. In all three cases, the gains or losses realized on call option premiums written is recorded as a net realized gain (loss) on sale of investments and derivatives in the statements of comprehensive income.

Covered call options give the holder the right to buy the securities from the ETF at a stated exercise price during the option period. During this period, these underlying securities held by the ETF are pledged as collateral. Securities so pledged are identified in the Schedule of Investment Portfolio as at June 30, 2026. The total fair value of collateral pledged as at June 30, 2026 is \$193,041,482.

(b) Investment income

Investment transactions are accounted for as of the trade date. Realized gains and losses from investment transactions are calculated on a weighted average cost basis. The difference between fair value and average cost, as recorded in the financial statements, is included in the statements of comprehensive income as part of the net change in unrealized appreciation (depreciation) of investments and derivatives. Interest income for distribution purposes from investments in bonds and short-term investments, if any, represents the coupon interest received by the ETF accounted for on an accrual basis. Dividend income is recognized on the ex-dividend date. Distribution income from investments in other investment funds or ETFs is recognized when earned.

Income from derivatives is shown in the statements of comprehensive income as net realized gain (loss) on sale of investments and derivatives; net change in unrealized appreciation (depreciation) of investments and derivatives; and, interest income for distribution purposes, in accordance with its nature.

Income from securities lending, if any, is included in "Securities lending income" on the statements of comprehensive income and is recognized when earned. Any securities on loan continue to be displayed in the schedule of investments and the market value of the securities loaned and collateral held is determined daily (see note 7).

If the ETF incurs withholding taxes imposed by certain countries on investment income and capital gains, such income and gains are recorded on a gross basis and the related withholding taxes are shown as a separate expense in the statements of comprehensive income.

(c) Foreign currency

Transactions in foreign currencies are translated into the ETF's reporting currency using the exchange rate prevailing on the trade date. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated at the period-end exchange rate. Foreign exchange gains and losses are presented as "Net realized gain (loss) on foreign

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

exchange", except for those arising from financial instruments at fair value through profit or loss, which are recognized as a component within "Net realized gain (loss) on sale of investments and derivatives" and "Net change in unrealized appreciation (depreciation) of investments and derivatives" in the statements of comprehensive income.

(d) Cost basis

The cost of portfolio investments is determined on an average cost basis.

(e) Increase (decrease) in net assets attributable to holders of redeemable units per unit

The increase (decrease) in net assets per unit in the statements of comprehensive income represents the change in net assets attributable to holders of redeemable units from operations divided by the weighted average number of units of the ETF outstanding during the reporting period. For management fees please refer to note 9.

(f) Unitholder transactions

The value at which units are issued or redeemed is determined by dividing the net asset value of the class by the total number of units outstanding of that class on the Valuation Date. Amounts received on the issuance of units and amounts paid on the redemption of units are included in the statements of changes in financial position.

(g) Amounts receivable (payable) relating to portfolio assets sold (purchased)

In accordance with the ETF's policy of trade date accounting for sale and purchase transactions, sales/purchase transactions awaiting settlement, if any, represent amounts receivable/payable for securities sold/purchased, but not yet settled as at the reporting date.

(h) Net assets attributable to holders of redeemable units per unit

Net assets attributable to holders of redeemable units per unit is calculated by dividing the ETF's net assets attributable to holders of redeemable units by the number of units of the ETF outstanding on the Valuation Date.

(i) Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of an investment, which include fees and commissions paid to agents, advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and any applicable transfer taxes and duties. Transaction costs are expensed and are included in "Transaction costs" in the statements of comprehensive income.

(j) Future accounting policy changes***Presentation and disclosure in financial statements (IFRS 18)***

IFRS 18 will replace IAS 1 Presentation of financial statements and applies for reporting periods beginning on or after January 1, 2027. The new standard introduces the following key new requirements.

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

- Entities are required to classify all income and expenses into five categories in the statement of income (loss) and comprehensive income (loss), namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly-defined operating profit subtotal. Net profit will not change.
- Management-defined performance measures (MPMs) are disclosed in a single note in the financial statements.
- Enhanced guidance is provided on how to group information in the financial statements.

In addition, all entities are required to use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method.

The Manager is still in the process of assessing the impact of the new standard, particularly with respect to the structure of the ETF's statement of comprehensive income (loss), the statement of cash flows and the additional disclosures required for MPM. The Manager is also assessing the impact on how information is grouped in the financial statements, including for items currently labelled as "other".

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

In preparing these financial statements, the Manager has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

The ETF may hold financial instruments that are not quoted in active markets, including derivatives. The determination of the fair value of these instruments is the area with the most significant accounting judgements and estimates that the ETF has made in preparing the financial statements. See note 6 for more information on the fair value measurement of the ETF's financial instruments.

5. FINANCIAL INSTRUMENTS RISK

In the normal course of business, the ETF's investment activities expose it to a variety of financial risks. The Manager seeks to minimize potential adverse effects of these risks for the ETF's performance by employing professional, experienced portfolio advisers, by daily monitoring of the ETF's positions and market events, and periodically may use derivatives to hedge certain risk exposures. To assist in managing risks, the Manager maintains a governance structure that oversees the ETF's investment activities and monitors compliance with the ETF's stated investment strategies, internal guidelines and securities regulations.

Please refer to the most recent prospectus for a complete discussion of the risks attributed to an investment in the units of the ETF. Significant financial instrument risks that are relevant to the ETF, and analysis thereof, are presented below.

(a) Market risk

Market risk is the risk that changes in market prices, such as interest rates, equity prices, foreign exchange rates and credit spreads (not relating to changes in the obligor's/issuer's credit standing) will affect the ETF's income or the fair value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

(i) Currency risk

Currency risk is the risk that financial instruments which are denominated in currencies other than the ETF's reporting currency, the Canadian dollar, will fluctuate due to changes in exchange rates and adversely impact the ETF's income, cash flows or fair values of its investment holdings. The ETF may reduce its foreign currency exposure through the use of derivative arrangements such as foreign exchange forward contracts or futures contracts. The following table indicates the foreign currencies to which the ETF had significant exposure as at June 30, 2026, and December 31, 2025, in Canadian dollar terms and the potential impact on the ETF's net assets (including the underlying principal amount of future or forward currency contracts, if any), as a result of a 1% change in these currencies relative to the Canadian dollar:

June 30, 2026	Financial Instruments	Currency Forward and/ or Futures Contracts	Total	Impact on Net Asset Value
Currency	(\$000's)	(\$000's)	(\$000's)	(\$000's)
U.S. Dollar	1,035,332	–	1,035,332	10,353
Total	1,035,332	–	1,035,332	10,353
As % of Net Asset Value	100.8%	–	100.8%	1.0%

December 31, 2025	Financial Instruments	Currency Forward and/ or Futures Contracts	Total	Impact on Net Asset Value
Currency	(\$000's)	(\$000's)	(\$000's)	(\$000's)
U.S. Dollar	741,839	–	741,839	7,418
Total	741,839	–	741,839	7,418
As % of Net Asset Value	100.9%	–	100.9%	1.0%

(ii) Interest rate risk

The ETF may be exposed to the risk that the fair value of future cash flows of its financial instruments will fluctuate as a result of changes in market interest rates. In general, the value of interest-bearing financial instruments will rise if interest rates fall, and conversely, will generally fall if interest rates rise. There is minimal sensitivity to interest rate fluctuation on cash and cash equivalents invested at short-term market rates since those securities are usually held to maturity and are short term in nature.

As at June 30, 2026, and December 31, 2025, the ETF did not hold any long-term debt instruments and did not have any exposure to interest rate risk.

(iii) Other market risk

Other market risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. The Manager has implemented internal risk management controls on the ETF which are intended to limit the loss on its trading activities.

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

The table below shows the estimated impact on the ETF of a 1% increase or decrease in the comparative index, based on historical correlation, with all other factors remaining constant, as at the dates shown. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The historical correlation may not be representative of future correlation.

Comparative Index	June 30, 2026	December 31, 2025
Cboe NASDAQ-100 Half BuyWrite V2 Index	\$9,448,274	\$6,813,887

(b) Credit risk

Credit risk on financial instruments is the risk of a financial loss occurring as a result of the default of a counterparty on its obligation to the ETF. It arises principally from debt securities held, and also from derivative financial assets, cash and cash equivalents, and other receivables. The ETF's maximum credit risk exposure as at the reporting date is represented by the respective carrying amounts of any debt instruments, derivative assets, plus any receivables, including accrued income receivable in the statements of financial position. The ETF's credit risk policy is to minimize its exposure to counterparties with perceived higher risk of default by dealing only with counterparties that meet the credit standards set out in the ETF's prospectus and, when necessary, receiving acceptable collateral.

As at June 30, 2026, and December 31, 2025, due to the nature of its portfolio investments, the ETF did not have any material credit risk exposure.

(c) Liquidity risk

Liquidity risk is the risk that the ETF will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The ETF's policy and the Manager's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stress conditions, including estimated redemptions of units, without incurring unacceptable losses or risking damage to the ETF's reputation. Generally, liabilities of the ETF are due within 90 days. Liquidity risk is managed by investing the majority of the ETF's assets in investments that are traded in an active market and can be readily disposed. The ETF aims to retain sufficient cash and cash equivalent positions to maintain liquidity; therefore, the liquidity risk for the ETF is considered minimal.

6. FAIR VALUE MEASUREMENT

Below is a classification of fair value measurements of the ETF's investments based on a three level fair value hierarchy and a reconciliation of transactions and transfers within that hierarchy. The hierarchy of fair valuation inputs is summarized as follows:

- Level 1: securities that are valued based on quoted prices in active markets.
- Level 2: securities that are valued based on inputs other than quoted prices that are observable, either directly as prices, or indirectly as derived from prices.
- Level 3: securities that are valued with significant unobservable market data.

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

Changes in valuation methods may result in transfers into or out of an investment's assigned level. The following is a summary of the inputs used as at June 30, 2026, and December 31, 2025, in valuing the ETF's investments and derivatives carried at fair values:

	June 30, 2026			December 31, 2025		
	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)
Financial Assets						
Equities	1,052,163,903	–	–	744,235,920	–	–
Total Financial Assets	1,052,163,903	–	–	744,235,920	–	–
Financial Liabilities						
Options	(18,484,790)	–	–	(3,688,770)	–	–
Total Financial Liabilities	(18,484,790)	–	–	(3,688,770)	–	–
Net Financial Assets and Liabilities	1,033,679,113	–	–	740,547,150	–	–

There were no significant transfers made between Levels 1 and 2 as a result of changes in the availability of quoted market prices or observable market inputs during the period or year shown. In addition, there were no investments classified in Level 3 for the period ended June 30, 2026, and for the year ended December 31, 2025.

7. SECURITIES LENDING

In order to generate additional returns, the ETF is authorized to enter into securities lending agreements with borrowers deemed acceptable in accordance with National Instrument 81-102 – *Investment Funds* ("NI 81-102"). Under a securities lending agreement, the borrower must pay the ETF a negotiated securities lending fee, provide compensation to the ETF equal to any distributions received by the borrower on the securities borrowed, and the ETF must receive an acceptable form of collateral in excess of the value of the securities loaned. Although such collateral is marked to market, the ETF may be exposed to the risk of loss should a borrower default on its obligations to return the borrowed securities and the collateral is insufficient to reconstitute the portfolio of loaned securities. Revenue, if any, earned on securities lending transactions during the period is disclosed in the ETF's statements of comprehensive income.

As at June 30, 2026 and December 31, 2025, the ETF was not participating in any securities lending transactions. For the periods ended June 30, 2026 and 2025, the ETF did not earn any income from securities lending transactions.

8. REDEEMABLE UNITS

The ETF is authorized to issue an unlimited number of redeemable, transferable Class E and US\$ Unhedged units each of which represents an equal, undivided interest in the net assets of the ETF. Each unit entitles the owner to one vote at meetings of unitholders. Each unit is entitled to participate equally with all other units with respect to all payments made to unitholders, other than management fee distributions, whether by way of income or capital distributions and, on liquidation, to participate equally in the net assets of the ETF remaining after satisfaction of any outstanding liabilities that are attributable to units of the ETF. All units will be fully paid and non-assessable, with no liability for future assessments, when issued and will not be transferable except by operation of law.

**Notes to Financial Statements** (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

The redeemable units issued by the ETF provide an investor with the right to require redemption for cash at a value proportionate to the investor's share in the ETF's net assets at each redemption date and are classified as liabilities as a result of the ETF's requirement to distribute net income and capital gains to unitholders. The ETF's objectives in managing the redeemable units are to meet the ETF's investment objective, and to manage liquidity risk arising from redemptions. The ETF's management of liquidity risk arising from redeemable units is discussed in note 5.

On any Valuation Date, unitholders of the ETF may (i) redeem units of the ETF for cash at a redemption price per unit equal to 95% of the closing price for units of the ETF on the TSX on the effective day of the redemption, where the units being redeemed are not equal to a prescribed number of units ("PNU") or a multiple PNU; or (ii) redeem, less any applicable redemption charge as determined by the Manager in its sole discretion from time to time, a PNU or a multiple PNU of the ETF for cash equal to the net asset value of that number of units.

Units of the ETF are issued or redeemed on a daily basis at the net asset value per security that is determined as at 4:00 p.m. (Eastern Time) each Valuation Date. Purchase and redemption orders are subject to a 3:00 p.m. (Eastern Time) cutoff time on Valuation Date.

The ETF is required to distribute all of its income (including net realized capital gains) that it has earned in the period to such an extent that the ETF will not be liable for ordinary income tax thereon. Income earned by the ETF is distributed to unitholders at least once per year, if necessary, and any such amount distributed by the ETF will be paid as a "reinvested distribution". Reinvested distributions on units of the ETF will be reinvested automatically in additional units of the ETF at a price equal to the net asset value per unit of the ETF on such day and the units of the ETF will be immediately consolidated such that the number of outstanding units of the ETF held by each unitholder on such day following the distribution will equal the number of units of the ETF held by the unitholder prior to the distribution. Reinvested distributions are reported as taxable distributions and used to increase each unitholder's adjusted cost base for the ETF. Distributions paid to holders of redeemable units, if any, are recognized in the statements of changes in financial position.

Please consult the ETF's most recent prospectus for a full description of the subscription and redemption features of the ETF's units.

For the periods ended June 30, 2026 and 2025, the number of units issued by subscription, the number of units redeemed, the total and average number of units outstanding was as follows:

Class of Units	Period	Beginning Units Outstanding	Units Issued	Units Redeemed	Ending Units Outstanding	Average Units Outstanding
Class E Units	2026	31,998,878	6,499,897	(1,050,000)	37,448,775	35,576,325
	2025	22,504,851	8,247,200	(1,075,000)	29,677,051	26,268,759
US\$ Unhedged Units	2026	262,512	275,511	(225,000)	313,023	316,896
	2025	–	–	–	–	–

9. EXPENSES AND OTHER RELATED PARTY TRANSACTIONS**Management fees**

The Manager provides, or oversees the provision of, administrative services required by the ETF including, but not limited to: negotiating contracts with certain third-party service providers, such as portfolio managers, custodians, registrars, transfer agents, auditors and printers; authorizing the payment of operating expenses incurred on behalf of the ETF; arranging for the maintenance of accounting records for the ETF; preparing reports to unitholders and to the applicable

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

securities regulatory authorities; calculating the amount and determining the frequency of distributions by the ETF; preparing financial statements, income tax returns and financial and accounting information as required by the ETF; ensuring that unitholders are provided with financial statements and other reports as are required from time to time by applicable law; ensuring that the ETF complies with all other regulatory requirements, including the continuous disclosure obligations of the ETF under applicable securities laws; administering purchases, redemptions and other transactions in units of the ETF; and dealing and communicating with unitholders of the ETF. The Manager provides office facilities and personnel to carry out these services, if not otherwise furnished by any other service provider to the ETF. The Manager also monitors the investment strategies of the ETF to ensure that the ETF complies with its investment objectives, investment strategies and investment restrictions and practices.

In consideration for the provision of these services, the Manager receives a monthly management fee at the annual rate of 0.65%, plus applicable sales taxes, of the net asset value of the ETF, calculated and accrued daily and payable monthly in arrears.

Any expenses of the ETF that are waived or absorbed by the Manager are paid out of the management fees received by the Manager.

Other expenses

In addition to the management fees, unless otherwise waived or absorbed by the Manager, the ETF pays all of its operating expenses, including but not limited to: audit fees; trustee and custodial expenses; administration costs; valuation, accounting and record keeping costs; legal expenses; permitted prospectus preparation and filing expenses; costs associated with delivering documents to unitholders; listing and annual stock exchange fees; CDS Clearing and Depository Services Inc. fees; bank related fees and interest charges; extraordinary expenses; unitholder reports and servicing costs; registrar and transfer agent fees; costs associated with the Independent Review Committee; income taxes; sales taxes; brokerage expenses and commissions; and withholding taxes.

The Manager, at its discretion, may waive and/or absorb a portion of the fees and/or expenses otherwise payable by the ETF. The waiving and/or absorption of such fees and/or expenses by the Manager may be terminated at any time, without notice, or continued indefinitely, at the discretion of the Manager.

10. BROKER COMMISSIONS, SOFT DOLLARS AND RELATED PARTY TRANSACTIONS

Brokerage commissions paid on securities transactions may include amounts paid to related parties of the Manager for brokerage services provided to the ETF.

Research and system usage related services received in return for commissions generated with specific dealers are generally referred to as soft dollars.

Total brokerage commissions paid to dealers in connection with investment portfolio transactions, soft dollar transactions incurred and amounts paid to related parties of the Manager, if any, for the periods ended June 30, 2026 and 2025, were as follows:

Period Ended	Brokerage Commissions Paid	Soft Dollar Transactions	Amount Paid to Related Parties
June 30, 2026	\$88,897	\$nil	\$nil
June 30, 2025	\$66,634	\$nil	\$nil

Notes to Financial Statements (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

In addition to the information contained in the table above, the management fees paid to the Manager described in note 9 are related party transactions, as the Manager is considered to be a related party to the ETF. Fees paid to the Independent Review Committee are also considered to be related party transactions. Both fees are disclosed in the statements of comprehensive income. The management fees payable by the ETF as at June 30, 2026, and December 31, 2025, are disclosed in the statements of financial position.

The ETF may invest in other ETFs managed by the Manager or its affiliates, in accordance with the ETF's investment objectives and strategies. Such investments, if any, are disclosed in the schedule of investments.

11. INCOME TAX

The ETF has qualified as a mutual fund trust under the *Income Tax Act* (Canada) (the "Tax Act") and accordingly, is not taxed on the portion of taxable income that is paid or allocated to unitholders. As well, tax refunds (based on redemptions and realized and unrealized gains during the year) may be available that would make it possible to retain some net capital gains in the ETF without incurring any income taxes.

12. TAX LOSSES CARRIED FORWARD

Capital losses for income tax purposes may be carried forward indefinitely and applied against capital gains realized in future years. Non-capital losses carried forwards may be applied against future years' taxable income. Non-capital losses that are realized in the current taxation period may be carried forward for 20 years. As at December 31, 2025, the ETF had no capital or non-capital losses available.

13. OFFSETTING OF FINANCIAL INSTRUMENTS

In the normal course of business, the ETF may enter into various master netting arrangements or other similar agreements that do not meet the criteria for offsetting in the statements of financial position but still allow for the related amounts to be set off in certain circumstances, such as bankruptcy or termination of the contracts. As at June 30, 2026 and December 31, 2025, the ETF did not have any financial instruments eligible for offsetting.

14. INTERESTS IN SUBSIDIARIES, ASSOCIATES AND UNCONSOLIDATED STRUCTURED ENTITIES

The ETF may invest in units of other ETFs as part of its investment strategies ("Investee ETF(s)"). The nature and purpose of these Investee ETFs generally, is to manage assets on behalf of third party investors in accordance with their investment objectives, and are financed through the issue of units to investors. At no time, would the ETF provide financial or other support to any Investee ETF, including assisting any Investee ETF in obtaining financial support.

In determining whether the ETF has control or significant influence over an Investee ETF, the ETF assesses voting rights, the exposure to variable returns, and its ability to use the voting rights to affect the amount of the returns. In instances where the ETF has control over an Investee ETF, the ETF qualifies as an investment entity under IFRS 10 – Consolidated Financial Statements, and therefore accounts for investments it controls at fair value through profit and loss. The ETF's primary purpose is defined by its investment objectives and uses the investment strategies available to it as defined in the ETF's prospectus to meet those objectives. The ETF also measures and evaluates the performance of any Investee ETFs on a fair value basis.

**Notes to Financial Statements** (unaudited) (continued)

For the Periods Ended June 30, 2026 and 2025

Investee ETFs over which the ETF has control or significant influence are categorized as subsidiaries and associates, respectively. All other Investee ETFs are categorized as unconsolidated structured entities. Investee ETFs may be managed by the Manager, its affiliates, or by third-party managers.

Investments in Investee ETFs are susceptible to market price risk arising from uncertainty about future values of those Investee ETFs. The maximum exposure to loss from interests in Investee ETFs is equal to the total fair value of the investment in those respective Investee ETFs at any given point in time. The fair value of Investee ETFs, if any, are disclosed in investments in the statements of financial position and listed in the schedule of investments. As at June 30, 2026, and December 31, 2025, the ETF had no exposure to subsidiaries, associates or unconsolidated structured entities.
